

Important 2019

High Priest Mageson 666

December 27, 2018

MOVING into 2019 the major issue for the world is not the French protests its what is going on with Wall street and the battle between President Trump and the Federal Reserve. The drop on Wall Street in the last few days is mirroring the 2008 engineered collapse these trends are not by accident the system is rigged from the inside. And note this is ten years from 2008 the enemy likes to pull things on their Kabbalistic dates it connects into their vortex of energy. This happens when the Jewish Federal Reserve is trying to raise the interest rates of their criminal usury operation which as the IMF which is a wing of the Jewish run criminal Fed warned a few months ago will collapse not just the American economy but the entire global economy in the worst economic collapse in history. If Trump is successful with his battle with the Fed the American economy will most likely recover enough to make this possibility much more unlikely but if the Jews win then you will experience a collapse that will make the Jewish engineered collapse of 1929 look like a small issue. Ten million Americans just vanished from record during the Great Depression and many people died from extreme poverty. Society was politically and socially destabilized and the Jewish funded and run Marxist Parties picked up a lot of power in America. After 2008 the reaction allowed the Jews to create the Marxist protest movements as an admitted attempt by the Marxist Parties in America to create new Communist political movement.

If the Jews collapse the global economy expect for the rise of mass Communist movements in America and everywhere. That's why they are trying to collapse everything they know they are losing the political and social battle for control.

Now for our members of the JoS your goal for the following year is to keep the Final RTR up and to either as an individual or in self organized groups with your own self autonomy to work together create new activism projects for the online world to get the word out and promote the JoS. The more people we have the more we have doing the Final RTR and helping in rituals to stop this. This can be anything from organized team social media activism on Twitter, Utube and other groups the new places like Gab, Bitschute and such as well use all social media platforms. Be creative and ask your GD's for help on this individual and as a group. Its time to step up the activism in 2019 because the Jews are playing for keeps and so are we. Make it a goal to do one act of social media activism a day from a post on the comment section of Utube video's to mainstream online articles getting the word out. But do this daily just like you do the Final RTR daily. This act only takes a couple of minutes of your day and saves humanity and the planet.

Everyone discuss your ideas for such here. We can put all our brain's together into a bigger brain.
